RIVESTIMENTO DECORATIVO PER INTERNI AD EFFETTO  
METALLIZZATO

DECORATIVE ARCHITECTURAL TROWEL-ON COATING, WITH  
STUNNING METALLIC PATTERNS

## RIVESTIMENTO DECORATIVO PER INTERNI AD EFFETTO METALLIZZATO ORO E ARGENTO

**DUNE** è una finitura per decorazioni di interni a base di cariche ad effetto tenuemente metallizzato. Queste cariche creano un mutevole e gradevole gioco di luce e colori riflessi.

Applicare uno strato di **NOVAPRIMER BIANCO**, primer acrilico caricato con farina di quarzo, diluito con il 50%-80% di acqua. Dopo almeno 8 ore, applicare due strati di **DUNE**, con un intervallo di 8 ore circa, a rullo di pelo corto, diluite con max il 20% di acqua e successivamente lisciare la superficie con spatola inox per ottenere un effetto "damascato". Per applicazioni a spatola si consiglia di non diluire il prodotto.

Se necessario, proteggere con **CLEAR COAT**, protettivo acrilico trasparente.

## DECORATIVE ARCHITECTURAL TROWEL-ON COATING, WITH STUNNING METALLIC PATTERNS WITH GOLD AND SILVER HIGHLIGHTS

**DUNE** collection consists of a water-based fine coating with metallic pigments, available with silver or gold highlights.

The effects achieved with this product remind of ancient tissues and are perfectly suitable for decoration of interior walls in classical and modern environments.

Apply one coat of **NOVAPRIMER BIANCO**, acrylic primer with quartz powders, diluted with 50%-80% of water. Apply two coats of **DUNE** with short-piled roller, diluted with 20% of water and smooth down with stainless steel or plastic trowel. For application with stainless trowel Dune will be used neat, with no water addition.

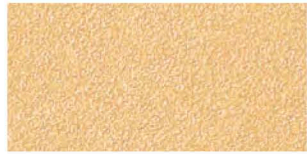

If required, protect the surface with **CLEAR COAT**.
